

Start here

Three steps to your first achievement tiles

- 1 Extract the ZIP**
Right-click the guild ZIP and choose Extract All. Open the extracted folder, then run EQ Legends Achievement Companion.exe.
- 2 Export your achievements in the game**
Use the game's achievement export. Include all categories and completion states for a full dashboard.
- 3 Choose your achievement TXT**
In the Companion, open Configuration, then Browse under Achievement export. Select your character's achievement export.

Configuration / Achievement export

YourCharacter_Server-Achievements.txt

Browse...

Choose your export here

Illustration: a simplified view of the file selector.

You only need to choose the file once.

The Companion remembers your selection. Keep the executable and its data folder together in a writable location.

Find your next achievement

Show filters, then click a tile for details

1 Choose what you want to work on

Open Show filters. Use ALL for everything or BANESTRIKE for that focus. Try Incomplete to hide finished achievements.

2 Choose one or more places

Check categories, farming regions or mob locations. Example: select the Karanas region to plan a farming trip.

Farming region

- ☒ Karanas
- ☐ Faydwer
- ☐ Planes

Pick several options

Within a list: any checked option can match.
Between filters: all conditions must match.

Illustration: simplified checkbox list.

3 Click an achievement tile

A narrow window grows to show details. Shrink restores its previous width. Recent progress first promotes matching tiles.

More space, less clutter

In Configuration, enable transparency and choose 15-100% opacity. Resize for one or several tile columns. Table restores cell copying; More contains CSV export.

Choose a farming option

Your saved choice guides the main table

Available mob locations

Select	Zone	Qualifying mobs
x	West Karana	Known race variants of bandits
Other zone options stay available		

Save research

Illustration: check the evidence for the exact target before farming.

1 Choose an option and save

Check the location you prefer, then click Save research. With no saved selection, the first ranked option is used.

2 Add useful information

Add other zones or qualifying mobs you know. Put private reminders in Personal notes; they do not change the table.

3 See other options while filtering

Enable Show zone options matching filters to display matching alternatives. Turn it off to return to your saved/default choice.

A listed location is guidance, not a guarantee.

Read the evidence and Still to verify fields. Faction effects and current spawns may need checking. Research saves locally; it does not sync to guildmates.

Live updates, your way

Combat log for live tracking. Export for actual counters.

1 Open Configuration

Under Combat log, use Browse log. Select Logs / eqlog_Character_Server.txt inside your game folder.

2 Choose live updates and popups separately

Check Enable live updates. Choose Show popups + sounds on or off, then Save live settings. Silent tracking is supported.

3 Test it, then play

In game, enter /log on. Keep the Companion running. Sound / popup options has preview buttons, volume and completion celebrations.

ACHIEVEMENT PROGRESSED

You Keep Dragon Me Into This 92 / 100

a fae drake

Refresh your achievement export periodically for best results.

Actual popup preview. The default position is top center, 5% down.
Use windowed or borderless mode. Volume 0 mutes.

Update the table by exporting again in the game.

The Companion automatically reads your updated achievement TXT. Load / Refresh also works.
New exports clear temporary live estimates.

Popups count recognized personal kill messages, not all group/raid credit. Old log entries are not replayed. Estimates do not change table counters. Share the original guild ZIP, not your used data folder.
